Work History

2021-06 - 2021-08

Bright Network Internship Experience
Bright Network

- Gained insight into working in the technology sector, attended remote sessions and completed an assigned research project.
- The online seminars included expert skills sessions led by **Amazon,Bloomberg, EY, Goldman Sachs, Google, Lloyds Banking Group, and Vodafone.**
- Completed independent research into the **applications of Face-ID being used in mobile banking.** This was accomplished by looking through the notes created during the seminars and external research. The skills that had been applied during this project included: **agile software development, clean code, verification testing, communication and collaboration.**
- The success of this project was measured through peer reviewing each presentation and identifying strengths/weaknesses with the project. This resulted in development of verbal communication, research and collaboration skills

2019-05 - 2020-06

IT Department
Habib Bank AG Zurich, London, England

- Primary responsibilities include **using spreadsheet software to log inventory and obtaining hardware information**
- Worked to maintain **outstanding attendance record,** consistently arriving to work ready to start immediately.
- Prepared variety of different written communications, reports and documents to

ensure smooth operations.

Education

2020-09 - Current

Bachelor of Science: Computer Science
Brunel University London

2018-09 - 2020-03

Nower Hill 6th Form A Levels
Biology, Chemistry, Maths

Personal Projects

- Alongside university, undertaking gaming projects such as my own version of mastermind on java and the game of pong on python has bolstered my coding skills and has provided me the ability to pursue more challenging projects. I am currently working on an e-portfolio employing my knowledge of html, css and javascript in the process of completion

Interests

Reading about latest AI advancements such as Neuralink and the future innovation surrounding it. Furthermore, recent cyber attacks, how they were carried out and the implications of them such as the "Colonial Pipeline cyber attack"
Passion for programming projects such as creating games
-currently working on web scraping using python
